

**REPORT
ON REGISTRATION
OF BIRTHS AND DEATHS
2014**

**REGISTRY OF BIRTHS AND DEATHS
IMMIGRATION AND CHECKPOINTS AUTHORITY
SINGAPORE**

P R E F A C E

Under the Registration of Births and Deaths Act (Chapter 267), the Registry of Births and Deaths has been charged with the responsibility of registering all live-births, still-births and deaths in Singapore.

The Report on Registration of Births and Deaths, 2014 is the 27th publication in the annual series by the Registry. The Report aims to provide an overview of the annual changes in the population, births, deaths and other vital statistics. The statistical tables and charts on vital statistics will be of interest to academics, demographers and medical professionals. Specimen certificates of and procedures for the registration of births, still-births and deaths have been included in the annexure.

The Registry of Births and Deaths gratefully acknowledges the assistance and contribution of the Ministry of Health, the Department of Statistics, the Singapore Police Force and all other agencies in the publication of this Report.

GENERAL

The Immigration & Checkpoints Authority (ICA) administers the Registration of Births and Deaths Act (Chapter 267). Under this Act, all live births, deaths and still births occurring within Singapore and its territorial waters are required to be registered within the stipulated period. The Registry also re-registers births under the Adoption of Children Act (Chapter 4).

2 In 2014, 42,232 live births, 19,393 deaths and 86 still births were registered. In this report, date of occurrence is adopted for the compilation of births statistics while date of registration is adopted for deaths statistics.

Late Registrations

3 Live births registered after 42 days from occurrence are classified as late registrations. In 2014 there were 234 late registrations of live births. Of these, 14 cases were registered after a lapse of 12 months from the date of birth.

4 Deaths registered after three days from occurrence are treated as late registrations. In 2014, there were 198 late registrations of deaths. Of these, 130 cases were registered after seven days from the date of death.

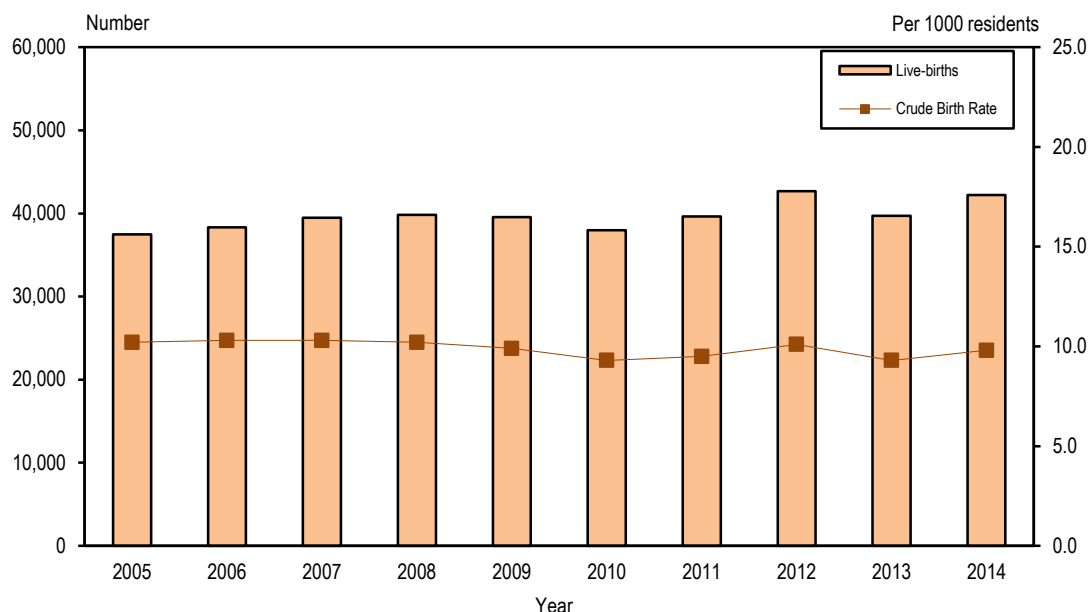

Re-Registration of Adopted Children

5 Under the Adoption of Children Act, the birth of a child shall be registered under the Registration of Births and Deaths Act upon an Adoption Order issued by the Court. If the child's birth had previously been registered under the Registration of Births and Deaths Act, the name of the child, as well as the names and other particulars of the adoptive parents, as recorded in the Adoption Order, are entered in the birth register in place of the natural or last adoptive parents of the child. In 2014, 319 children were adopted and registered under the Act.

LIVE BIRTHS

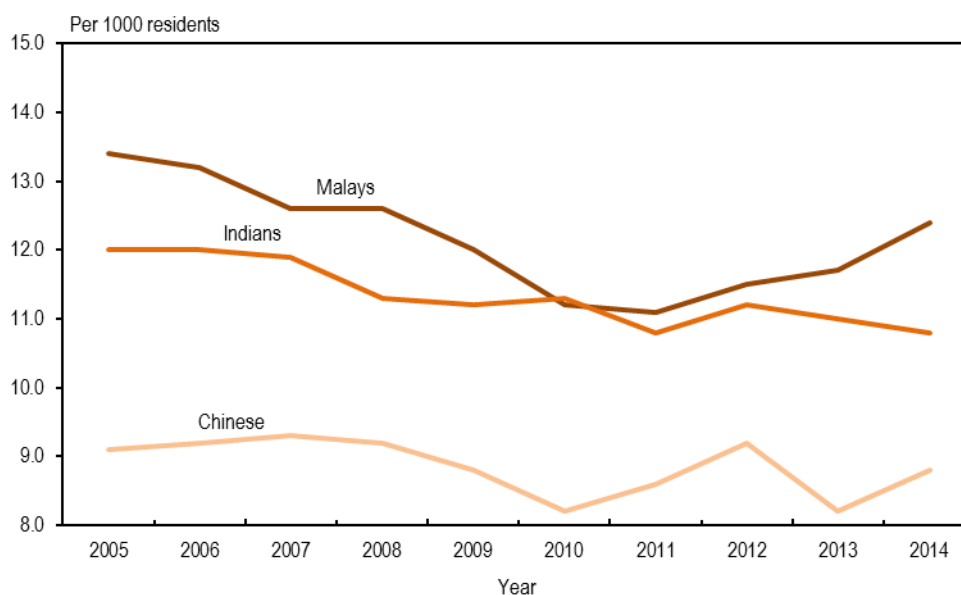

6 The number of live births was 42,232 in 2014, showing an increase of 6.3% compared with 39,720 in 2013. The crude birth rate increased from 9.3 to 9.8 per 1,000 Singapore residents this year (Chart 1).

Chart 1
LIVE BIRTHS AND CRUDE BIRTH RATES, 2005 – 2014

7 Among the newborns, 25,958 (61.5%) were Chinese, 6,468 (15.3%) Malays, 4,678 (11.1%) Indians and 5,128 (12.1%) of newborns were of other races. In 2014, Malays registered the highest birth rate of 12.4 per 1,000 residents followed by Indians at 10.8 per 1,000 residents. Chinese registered the lowest rate of 8.8 per 1,000 residents.

Chart 2
CRUDE BIRTH RATE BY ETHNIC GROUP, 2005 – 2014

Teenage Births

8 There were 406 live births born to teenagers aged 19 and below in 2014, a reduction of 16.6% as compared with 487 in 2013. 51.7% of the teenage births were born to Malays. Chinese (33.5%), Indians (9.4%) and other ethnic groups (5.4%) accounted for the remaining teenage births. Indian teenage births decreased from 6.4% in 2013 to 5.4% in 2014. Chinese increased from 31.8% to 33.5%. The proportion of Malay teenage births increased marginally from 51.5% in 2013 to 51.7% in 2014.

Table I
TEENAGE BIRTHS BY ETHNIC GROUP, 2005 - 2014

Year	Chinese	Malays	Indians	Others	Total
2005	251 (29.4%)	485 (56.9%)	74 (8.7%)	43 (5.0%)	853 (100.0%)
2006	229 (27.3%)	462 (55.1%)	75 (9.0%)	72 (8.6%)	838 (100.0%)
2007	231 (28.2%)	458 (55.8%)	77 (9.4%)	54 (6.6%)	820 (100.0%)
2008	265 (32.5%)	419 (51.3%)	83 (10.2%)	49 (6.0%)	816 (100.0%)
2009	209 (30.8%)	375 (55.3%)	53 (7.8%)	41 (6.1%)	678 (100.0%)
2010	231 (36.1%)	309 (48.2%)	63 (9.8%)	38 (5.9%)	641 (100.0%)
2011	187 (30.0%)	339 (54.3%)	67 (10.7%)	31 (5.0%)	624 (100.0%)
2012	183 (31.8%)	310 (53.9%)	45 (7.8%)	37 (6.5%)	575 (100.0%)
2013	155 (31.8%)	251 (51.5%)	50 (10.3%)	31 (6.4%)	487 (100.0%)
2014	136 (33.5%)	210 (51.7%)	38 (9.4%)	22 (5.4%)	406 (100.0%)

Single Parent Registration Births (SP Births)

9 In 2014, 446 live births were registered without the father's name. Out of these 446 SP births, 105 (23.5%) births were born to teenagers age 19 and below.

10 As similarly observed in teenage births, Malays made up the largest proportion of SP births. However, their proportion saw a reduction from 45.9% in 2013 to 42.8% in 2014. On the contrary, the proportion of SP Chinese increased from 34.9% in 2013 to 38.8% in 2014.

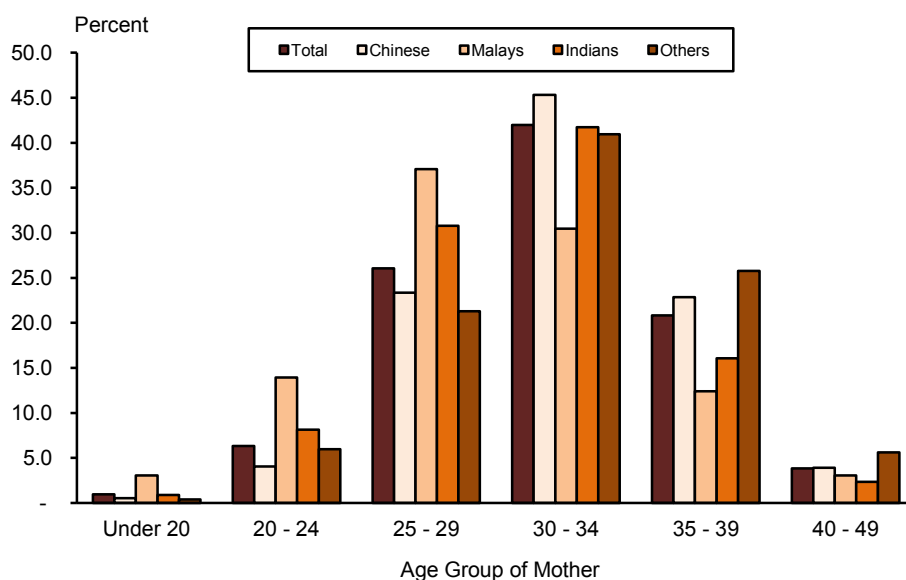

Table II
SP BIRTHS BY ETHNIC GROUP, 2005 – 2014

Year	Chinese	Malays	Indians	Others	Total
2005	160 (33.3%)	240 (49.9%)	57 (11.8%)	24 (5.0%)	481 (100.0%)
2006	158 (31.9%)	248 (50.1%)	52 (10.5%)	37 (7.5%)	495 (100.0%)
2007	153 (27.3%)	311 (55.4%)	58 (10.3%)	39 (7.0%)	561 (100.0%)
2008	199 (36.2%)	270 (49.1%)	56 (10.2%)	25 (4.5%)	550 (100.0%)
2009	205 (37.0%)	263 (47.5%)	52 (9.4%)	34 (6.1%)	554 (100.0%)
2010	212 (38.3%)	242 (43.7%)	57 (10.3%)	43 (7.7%)	554 (100.0%)
2011	164 (31.6%)	281 (54.1%)	39 (7.5%)	35 (6.8%)	519 (100.0%)
2012	180 (34.4%)	258 (49.4%)	43 (8.2%)	42 (8.0%)	523 (100.0%)
2013	170 (34.9%)	224 (45.9%)	47 (9.6%)	47 (9.6%)	488 (100.0%)
2014	173 (38.8%)	191 (42.8%)	45 (10.1%)	37 (8.3%)	446 (100.0%)

Age and Ethnic Group of Mother

11 The highest proportion of live births were born to mothers aged 30 - 34 years (42.0%), followed by mothers aged 25 - 29 years (26.1%) and 35 - 39 years (20.8%) (Chart 3).

Chart 3
LIVE BIRTHS BY AGE GROUP
AND ETHNIC GROUP OF MOTHER, 2014

Birth Order

12 Live births in 2014 comprised 48.1% 1st order, 36.2% 2nd order, 11.5% 3rd order and 4.2% 4th & higher order births (Chart 4).

13 Based on the resident birth order figures, it seems that women have been delaying the birth of children till a later age. The median age of mothers showed increases across all birth orders when compared against 2005. For the first order births, the median age of mothers increased from 29.2 years in 2005 to 30.4 years in 2014. Similarly, the median age for mothers of second and third order births increased from 31.7 years to 32.6 years and 33.5 yrs to 34.0 years respectively (Table III).

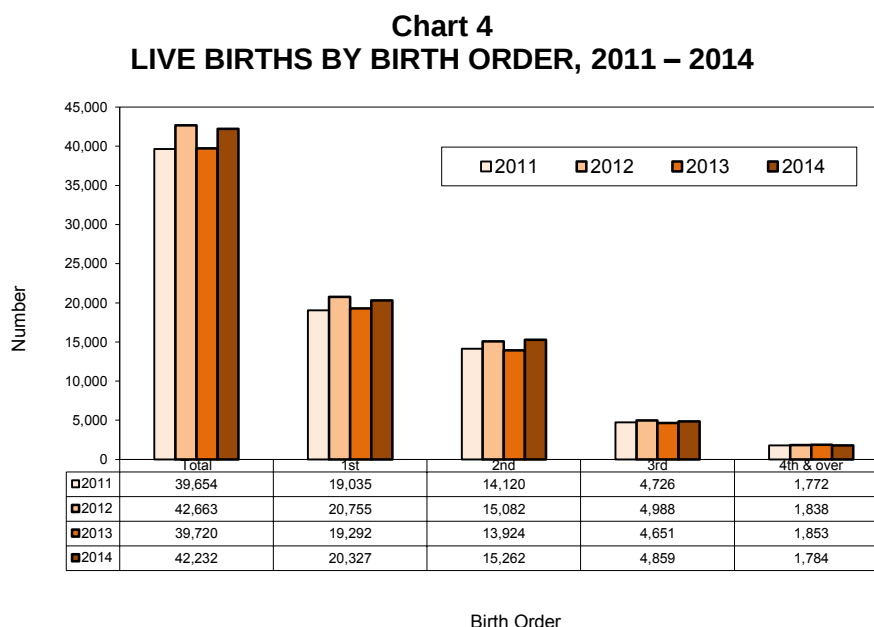

Table III
RESIDENT BIRTH ORDER BY PERIOD AND
MEDIAN AGE OF MOTHER, 2005, 2012 – 2014

Birth Order	2005	2012	2013	2014
Birth Order	Age	Age	Age	Age
1 st order	29.2 yrs	30.2 yrs	30.3 yrs	30.4 yrs
2 nd order	31.7 yrs	32.3 yrs	32.5 yrs	32.6 yrs
3 rd order	33.5 yrs	34.2 yrs	34.2 yrs	34.0 yrs
4 th order	34.3 yrs	34.7 yrs	35.0 yrs	34.7 yrs

First Time Mother

14 The median age of resident live births for first time mothers was 30.4 years at the time of giving birth. Malay mothers have their first child at 27.5 years, against 31.1 years, 29.3 years and 30.6 years for Chinese, Indians and other ethnic groups respectively.

15 Among these first time mothers, 53.2% had university degrees and 46.8% had 'A' level or lower qualification. The percentage of first time mothers with university degrees had increased by 6.7% in 2014 as compared to 2013.

16 13,376 or 74.4% of the first time resident live births mothers were employed in 2014. Of these, 83.6% were holding executive, managerial, professional and related occupations. Clerical and sales related professions accounted for another 15.4% of working mothers.

Type of Birth and Period of Gestation

17 41,067 mothers had single births, 573 had twins (including five with one live birth and one still birth) and 8 had triplet.

18 The modal gestation period for single births was 38 weeks which accounted for 31.2%. The modal gestation period for twin births was 37 weeks, accounting for 30.0% of total twin births. Premature single births, defined as births with gestation period of 36 weeks or less, totaled 2,982 (7.3%) of single births. The number of premature twins, with 36 weeks or less gestation period, accounted for 63.0% of twin births (Table V).

Table V
LIVE BIRTHS BY PERIOD OF GESTATION AND TYPE OF BIRTH, 2014

Period of Gestation (weeks)	Total		Type of Birth

Birth Weight and Age of Mother

19 Birth weight of 3,000 - 3,499 grammes accounted for 42.8% of newborns. Babies weighing between 2,500 - 2,999 grammes constituted 31.9% while those weighing above 3,500 grammes accounted for 16.2%. Only 9.1% of the babies weighed under 2,500 grammes. Birth weight was found to correlate positively with period of gestation. Table VII reflects a strong tendency that the longer the gestation period, the greater the baby's weight became. Twin births were generally lighter in weight than single births.

DEATHS

20 In 2014 a total of 19,393 deaths were registered, an increase of 455 (or 2.4%) as compared with 18,938 deaths registered in 2013. Among them, 95.1% of the deaths were certified by medical officers and practitioners, 4.9% by Coroners (Table VIII). Natural causes accounted for 95.3% of total deaths while fatal accidents and violence accounted for the remaining 4.7% (Table IX).

Table VIII
DEATHS BY TYPE OF CERTIFICATION, 2005, 2012 - 2014

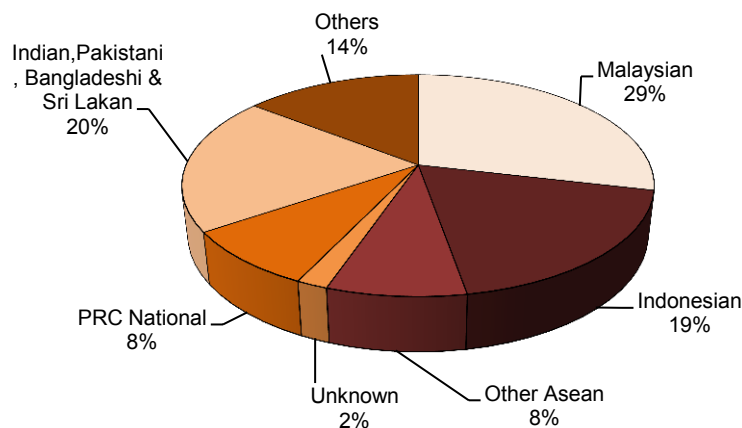

Certification By	2005		2012		2013		2014	
	Number	Percent	Number	Percent	Number	Percent	Number	Percent
Total	16,215	100.0	18,481	100.0	18,938	100.0	19,393	100.0
Medical Officers & Practitioners	12,643	78.0	15,892	86.0	17,934	94.7	18,442	95.1
Coroners	3,531	21.8	2,589	14.0	1,004	5.3	951	4.9
Authorized Officers	41	0.2	-	-	-	-	-	-

21 Deaths that occurred in hospitals constituted 60.6% of the total; with 57.5% in public sector hospitals and 3.1% in private sector hospitals. Deaths in residence made up 26.7%, while 5.3% were in nursing homes and charitable institutions, 4.1% were in sick receiving houses and 3.3% at other locations.

Nationality

22 6.0% of deaths registered in 2014 were non-Singapore residents (chart 5). They were mostly Malaysians and Indonesians.

Chart 5
DEATHS BY NON-RESIDENT STATUS, 2014

Major Causes of Death

23 In 2014, malignant neoplasms and lung & respiratory system diseases are the two common causes of deaths in Singapore. Altogether, they accounted for half (51.2%) of total deaths. Heart & hypertensive diseases and cerebrovascular disease were another two prevalent causes responsible for 21.5% and 8.4% of death cases respectively. As compared with the previous year (measured in terms of percentage), lung & respiratory system diseases shows a marginal increase of 0.4% and malignant neoplasms declines

by 1.1%. Unnatural causes such as accidents, suicides and other external injuries made up 4.7%.

Table IX
COMPARATIVE MAJOR CAUSES OF DEATH BETWEEN 2013 AND 2014

Cause of Death	2013		2014

Total	18,938	100.0	19,393	100.0

Average Age at Death

24 15,466 (or 79.8%) deceased persons in 2014 were aged 60 years and over. Persons aged between 50 and 59 years old accounted for 11.3% of the total deaths. Deaths of persons under one year of age (infant deaths) numbered 83 (or 0.4%).

25 The average age at death (AA in short), measured by the median was 75.5 years. The highest AA of 83.1 years was recorded for those who died of lung & respiratory system diseases, followed by 81.3 years for kidney & disorders of urinary system and 79.4 years for cerebrovascular disease.

Table XI
TRENDS OF THE AVERAGE AGE AT DEATH BY CAUSES OF DEATH

Cause of Death	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014
Natural Causes

Other Natural Cases	65.2	64.9	65.9	66.9	66.4	69.5	69.8	71.4	71.9	72.8
Accidents and Violence (All Forms)										
Accidents	47.4	46.3	43.9	48.0	49.1	49.2	49.9	52.9	52.5	53.8
Suicides	44.8	47.3	47.1	48.2	46.4	47.1	51.4	47.9	47.5	50.9
Other External Causes	43.1	43.0	42.7	42.8	42.8	42.8	42.7	39.0	42.1	39.4
ALL	72.6	73.0	73.3	73.3	73.9	74.4	74.3	74.2	74.9	75.5

26 The AA has been gradually lengthening over the years. It was 72.6 years in 2005. It increased to 73.9 years and 75.5 years in 2009 and 2014 respectively. Not including other natural causes, the increase in AA was most conspicuous among Diabetes Mellitus (71.4 years in 2005 to 76.7 years in 2014) and Kidney & Disorders of Urinary System (77.5 year in 2005 to 81.3 years in 2014).

Gender

27 Males outnumbered females in mortality, giving a ratio of 1,189 males to 1,000 females. In terms of causes of death, males registered a higher proportion in heart & hypertensive diseases and accidents & violence while females registered a higher proportion in kidney & disorders of urinary system and cerebrovascular disease.

Table XII
MORTALITY IN 2014 BY SEX AND CAUSES OF DEATH

Cause of Death	Total		Male		Female	
	Number	Percent	Number	Percent	Number	Percent
Natural Causes	18,484	95.3	9,865	93.6	8,618	97.3

30 Table XV shows that there were disparities in the average age at death among different ethnic groups. The AA for Chinese was 77.1 years compared with 70.1 years for Malays, 67.8 years for Indians and 66.4 years for other ethnic groups. The gap in AA between Chinese and non-Chinese ethnic groups existed in all major causes of death.

Table XV

Occupation

31 A comparison between occupation and causes of death in Table XVI shows that clerical workers and professionals had a higher proportion of cases that died due to malignant neoplasm. Heart & hypertensive diseases were the most common cause of death among the cases belonging to other occupational groups.

Infant Mortality

32 Of the 83 infant deaths registered in 2014, 42 were males, 40 were females and one was of unknown sex. The main causes of infant death were Perinatal Originated Conditions (50.6%) and Congenital Anomalies (28.9%). The infant mortality rate in 2014 was 1.8 per 1,000 resident live births (Chart 6).

Chart 6
INFANT MORTALITY RATES, 2005 – 2014

Neonatal Mortality

33 The number fell from 60 in 2005 to 50 in 2014. Correspondingly, the neonatal mortality rate also dropped from 1.3 per 1,000 resident live births in 2005 to 1.1 per 1,000 resident live births in 2014.

Perinatal Mortality

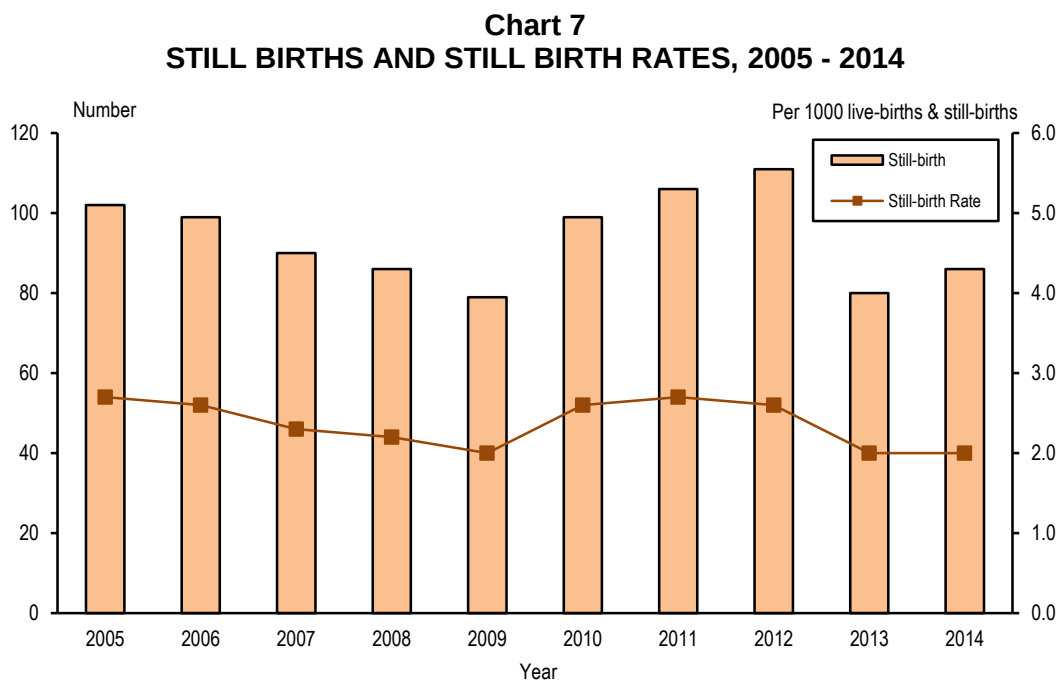

34 Including still births, there were 123 perinatal deaths registered in 2014. The perinatal mortality rate was 2.9 per 1,000 live births and still births.

Maternal Mortality

35 In 2014, only one maternal death was registered.

STILL BIRTHS

36 The percentage of still births increased by 7.5% compared with 80 in 2013. Chart 7 shows that the crude still birth rates varied between 2.0 to 3.1 per 1,000 live births and still births for the last 10 years.

37 Still births registered in 2014 comprised 44 male and 42 female. Still births in excess of 36 weeks of gestation period constituted 27.9% of total still births.

ANNEXURE

PROCEDURES FOR THE REGISTRATION OF LIVE BIRTHS, DEATHS AND STILL BIRTHS

LIVE BIRTHS

All live births occurring in Singapore can be registered at one of the following Birth Registration Centres stated below:

- a Registry of Births and Deaths at the ICA Building;
- b Gleneagles Hospital;
- c KK Women's and Children's Hospital;
- d Mount Alvernia Hospital;
- e Mount Elizabeth Hospital;
- f Mount Elizabeth Novena Hospital;
- g National University Hospital;
- h Parkway East Hospital;
- i Raffles Hospital;
- j Singapore General Hospital; or
- k Thomson Medical Pte Ltd.

2 The following documents are required to be produced at the time of birth registration:

- a Notification of Live birth;
- b Identification Documents of both parents i.e. Singapore Pink Identity Card or Foreign Travel Document (with their Singapore Blue Identity Card or Long Term Pass Card issued by ICA, if applicable); and
- c Original Marriage Certificate of parents.

3 The Certificate of Registration of Birth is prepared in 2 copies. One copy is retained by the Registrar while the other copy is laminated and issued to the informant. The fee for a birth certificate is S\$18.00. For births registered at the respective maternity hospitals, these centres may charge an additional administrative fee on top of the fee for a birth certificate.

4 All live births must be registered within 14 days. Registrations effected after 14 days but before the expiry of 42 days are classified as Delayed Registrations. Registrations after the expiry of 42 days are classified as Late Registrations.

DEATHS

5 Deaths which occur in government restructured hospitals can be registered at the respective hospitals. Deaths which occur elsewhere in Singapore are registered at the Registry of Births and Deaths or any of the Police Divisional Headquarter/Neighbourhood Police Centre or Post. The following documents are required to be produced for registration:

- a Certificate of Cause of Death issued by a medical practitioner;
- b Identification Document of deceased, i.e. Singapore Pink Identity Card or Foreign Travel Document (with their Singapore Blue Identity Card or Long Term Pass Card issued by ICA, if applicable);
- c Singapore Passport of deceased;
- d Birth Certificate or Certificate of Citizenship of deceased, where applicable; and
- e Identification Document of the Informant, i.e. Singapore Pink Identity Card or Foreign Travel Document (with their Singapore Blue Identity Card or Long Term Pass Card issued by ICA).

6 A death which has occurred at home and is not attended by a doctor must first be reported to the Police who will make arrangements for an authorised medical practitioner to examine the body. The medical practitioner will issue a Certificate of Cause of Death if he is satisfied that the death is due to natural causes. The death must then be registered at the Registry of Births and Deaths or any of the Police Divisional Headquarter/Neighbourhood Police Centre or Post. The documents required to be produced for registration are as mentioned in Paragraph 5 above.

7 The Certificate of Registration of Death, together with the attached Burial/Cremation Permit, is prepared in 2 copies. One copy is issued to the informant and the other copy is retained by the Registrar. An acknowledgement slip for the documents (as mentioned in paragraph 5b, c and d) surrendered will be issued to the informant. All documents invalidated are returned to the informant.

8 No fee is required for the registration of a death. If the body of a deceased is to be exported to another country, an Export Permit must be obtained from the Port Health Officer, Ministry of the Environment and Water Resources. The Export Permit can only be obtained after the death has been registered.

9 All deaths in Singapore must be registered within three days of occurrence. Death registrations after three days are classified as Late Registrations.

STILL-BIRTHS

10 Still-births which occur in government restructured hospitals are registered at the respective hospitals. Still-births which occur elsewhere in Singapore are registered at the Registry of Births and Deaths or any of the Police Divisional Headquarter/Neighbourhood Police Centre or Post. The following documents are required to be produced for registration:

- a Notification of Still-birth issued by a doctor;
- b Identification Documents of both parents i.e. Singapore Pink Identity Card or Foreign Travel Document (with Singapore Blue Identity Card or Long Term Pass Card issued by ICA, if applicable); and
- c Identification Document of the Informant, i.e. Singapore Pink Identity Card or Foreign Travel Document (with Singapore Blue Identity Card or Long Term Pass Card issued by ICA).

11 Upon registration, a Permit to Bury or Cremate Body and an acknowledgement slip for the documents surrendered are issued to the informant while the Certificate of Registration of Still-birth is retained by the Registrar. No fee is required for the registration of a still-birth.

12 All still-births must be registered within 14 days.

EXPLANATORY NOTES

EXPLANATORY NOTES

- 1 *Resident population* refers to Singapore citizens and permanent residents. Data from 2003 onwards exclude residents who have been away from Singapore for a continuous period of 12 months or longer as at the reference period.
- 2 For 1980, the annual population growth rate refers to the annualised increase of the resident population over the previous Census year (1970). For 1990, the rate is computed based on 1989 and 1990 data using de facto concept. For 2003, the rate is computed based on 2003 unrevised population estimates. From 1980 onwards, this rate is based on Singapore residents only.
- 3 *Sex ratio* refers to the number of males per thousand females. From 1980 onwards, this **ratio** is based on Singapore residents only.
- 4 *Natural increase* refers to the excess of births over deaths.
- 5 *Crude rate of natural increase* refers to the natural increase per thousand population. From 1980 onwards, this rate is based on Singapore residents only.
- 6 A *live birth* refers to an infant, irrespective of the duration of gestation, which after the complete expulsion or extraction from its mother, breathes or shows any other signs of life. From 1953 onwards, the figures are based on date of occurrence. Prior to 1953, they are based on date of registration.
- 7 *Crude birth rate* refers to the number of live births per thousand population. From 1980 onwards, this rate is based on Singapore residents only.
- 8 *Birth order* refers to the numerical order of a child in relation to all previous live births of its mother.
- 9 *Period of gestation* refers to the number of weeks a baby remained in its mother's womb before birth.
- 10 A *premature birth* refers to a birth with less than 37 weeks of gestation.
- 11 A *death* refers to the permanent disappearance of all signs of life of a living person at any time. Death figures referred to the number of deaths registered during the year.
- 12 *Crude death rate* refers to the number of deaths per thousand population. From 1980 onwards, this rate is based on Singapore residents only.
- 13 *Infant mortality* refers to death of persons under one year of age.

- 14 *Crude infant mortality* rate refers to the number of infant deaths per thousand live births. From 1980 onwards, this rate is based on resident live births only.
- 15 *Neonatal mortality* refers to death of persons under 28 days of age.
- 16 *Crude neonatal mortality rate* refers to the number of neonatal deaths per thousand live births. From 1990 onwards, this rate is based on resident live births only.
- 17 *Perinatal mortality* refers to still birth and death of persons under seven days of age.
- 18 *Crude perinatal mortality rate* refers to the number of perinatal deaths per thousand live births and still births.
- 19 *Maternal mortality* refers to deaths of mothers owing to deliveries and complications arising from pregnancy, childbirth and puerperium.
- 20 *Crude maternal mortality rate* refers to the number of maternal deaths per thousand live births and still births.
- 21 A *still birth* refers to an infant born after a minimum of 28 weeks of gestation, which after expulsion or extraction from its mother, does not breathe or show any signs of life. Still birth figures referred to the number of still births registered during the year.
- 22 *Crude still birth rate* refers to the number of still births per thousand live births and still births.
- 23 Resident live-births refer to those with at least one parent who is Singapore citizen or permanent resident.
